PROFILE

Experienced Front-End Developer with over 10 years of expertise in JavaScript, React, Vue.js, and TypeScript, specializing in creating dynamic, user-friendly web applications. Demonstrated success in delivering high-quality, thoroughly tested code, and fostering collaborative, productive team environments through effective knowledge sharing and mentorship. A passionate learner committed to ongoing improvement, consistently contributing innovative solutions and approaches to complex development challenges.

SKILLS

JavaScript • TypeScript • React • VueJS • Nextjs • Nodejs • Express • Jest •
React Testing Library • Redux • TailwindCSS • SCSS

PROFESSIONAL EXPERIENCE

Senior Front-end Engineer, *Heaptify (Remote)*   09/2023 – Present | England
- Defined optimal technology stacks for projects to ensure robust and scalable solutions.
- Led project management efforts, ensuring timely delivery within defined scope parameters.
- Orchestrated cross-functional collaboration to align projects with timelines, goals, and comprehensive development strategies.
- Coordinated tasks, delegated responsibilities, and monitored progress to maintain project momentum.
- Integrated a comprehensive component library for consistency and efficiency, alongside implementing unit tests to ensure reliability and quality.
- Utilized GraphQL to streamline backend communications for efficient data retrieval and management.
- Integrated projects with a micro-frontend architecture to enhance scalability and maintainability.

Senior Frontend Developer, *Deriv (On-Site)* 🔗   01/2023 – 08/2023 | Malaysia
- Collaborated cross-functionally to deploy 20+ dynamic features for Deriv's web apps using React for improved user experience.
- Developed and maintained a Storybook instance for Deriv's design system, collaborated with designers and developers to create reusable UI components, and contributed to the component library.
- Implemented MobX to manage complex application states in Deriv's web applications, which led to more predictable user interactions and more robust and maintainable user interfaces.
- Wrote comprehensive unit tests for 50+ components, ensuring reliable and maintainable code with reduced bugs.
- Actively participated in 100+ code reviews, maintaining best practices and code quality, while sharing knowledge through participating in meetings and presenting on various topics.
- Worked under tight deadlines in a fast-paced environment using agile methodologies, and demonstrated strong problem-solving skills as a Release Manager.

Senior Frontend Developer, *Re-Work (Remote)* 🔗   03/2022 – 12/2022 | Malaysia
- Built 10+ web apps using React, Web Socket, and APIs, emphasizing component-based architecture and efficient state management with MobX.

- Developed custom components with React, Stitches, and Storybook, leading to reusable and easily maintainable code.
- Wrote extensive unit tests for all components, guaranteeing reliability and minimizing bugs.
- Reviewed over 1000 code submissions, giving constructive feedback to fellow developers, and ensuring adherence to best practices.

Front-end Team Lead, *Yasna Team (Hybrid)*   02/2020 – 07/2022 | Tehran, Iran
- Led a front-end team in developing a modular platform, using Vue.js and Vuex, tailored for diverse projects.
- Developed over 50+ unique components and created UI framework using Vue.js, TypeScript, and Modular SASS.
- Applied a truly modular system and developed an exclusive CLI command, streamlining the development process.
- Worked closely with the UI team to develop a UI kit that enhanced the consistency and usability of our product.
- Conducted code reviews, provided feedback to team members, and mentored junior developers to improve code quality, and maintainability, and enhance their contributions to the team.
- Improved performance and reduced load times by optimizing code.

Front-end Developer, *Freelance*   01/2017 – 01/2020 | Tehran, Iran
- Develop Applications UI via emerging front-end Technologies such as Vue.js and SASS.
- Tested web-based product functionality and delivered iterations to customers.

Front-end Developer, *Hamikar*   12/2015 – 10/2016 | Tehran, Iran
- Creating UI kit for redesigning the Web App of the company
- Developing a new version of the web app using Angular.js and Angular Material Framework
- Review team member codes and train interns.

Front-end Developer, *Freelance*   07/2011 – 09/2015 | Tehran, Iran
- Developed UI for applications using emerging front-end technologies like jQuery and SASS, and within front-end web frameworks like Bootstrap.
- Utilized associated templates and tools to shorten development times.
